
Images won't load

Posted by timmy jake - 2013/03/15 20:25

I'm running joomla 2.5 and recently downloaded the ARI image slider. The module loads, but no images. I am very new to Joomla and websites, Please help!

Hello,

Where we can see the problem?

Regards,
ARI Soft

You can see the problem from the main page. The loading sign just goes around and around... I'll give you the name of the website so you can look at it yourself. Its victorianbeauty.net
Its still in progress and all of the files are being switched over and its offline, but I'll put it online for a while so you can see it.

It seems the module is configured incorrectly. What value do you use for "Image path" parameter?

Regards,
ARI Soft

/home/victor45/public_html/images/stories/fruit/ariimageslider.ini
that's the path to the folder.

Use images/stories/fruit as value for "Image path" parameter.

Regards,
ARI Soft
