
Link to another webpage.

Posted by wontonin - 2013/03/25 11:23

Hi!

I'd like to know if it's possible to link different images of the same slide to different webpages. Use Ari Slide as an image menu.

I think that if every image has it's own link, maybe I can change it and link each image to different webpages, but I can't find how to make it.

Thank you!

PD: this is mi web with Ari Slider: www.ruisaba.com

Hello,

Links can be defined in INI file. Link to a sample INI file and instructions how to use it can be found in "Description" section on module settings page.

Regards,
ARI Soft
