## ARI Image Slider and 64-bit IE 10 browser

Posted by polk251068 - 2013/04/19 01:17

---

Hi

I am using successfully Ari Image Slider with URL links. Everything works fine on IE 10 32-bit, but with 64-bit MS window 7 ARI does not react on external link.

Cursor is not changing over the image to see external link.

Can you please advice?

POLI

Hello,

Where we can see the problem?

Regards,

Hi,

Thank you for your reply. Please go to one of my client's web site [www.arielaustralia.com](http://www.arielaustralia.com).

On the main page you should see "About Ariel Australia" or "Meet Paul Cohen" images with text. When you move cursor on these objects, it will not give you an option to click and go to the appropriate link/page.

regards,  
poli

Did you ever find a solution? I don't see where you use the slider on your site but I'm having the same issue you describe on my site.

Javascript errors which are not related to "ARI Image Slider" appear on your site. It seems they affect on "ARI Image Slider". Fix the errors and the slider should work fine.
