
ARI Image Slider Description file not workng

Posted by vikramasia - 2013/04/20 11:03

Sir I am using wampp in windows 7. Joomla 3.0.3

I have installed Image Slider module. I have kept the images inside /images/top banner/

Name of images hello.jpg and bye.jpg of size 1189x282. In the same folder I have kept a file info.ini with following contents

```
hello.jpg="This is a bread"
```

```
bye.jpg="A cup of coffee"
```

```
hello.jpg="http://demo2.ari-soft.com"
```

```
bye.jpg="http://www.ari-soft.com"
```

```
hello.jpg="Coffee"
```

```
bye.jpg="tea"
```

In "description file" field in module config. also I have kept info.ini name.

Image path is also set correctly. Images are showing up but respective links are not forming as written in info.ini. I Cant click on them to go to link.

Please tell solution. I have Checked with yes and no values of Support multi-language description. If i set default link, then the same link comes for all images which I dont want.

Hello,

Where we can see the problem?

Regards,

ARI Soft

I have the same problem with joomla 3.0.3. It looks like a bug. Description file is not working. But i found that when I load the Kunena's forum main page and have the ariimage as a module, description file works! In all other pages of my site it doesn't work. I have my site loaded locally so you cannot see the problem :dry:

The extension works fine on our test server including J! 3.x.

We can investigate the problem if you provide a link to a page where we can see it and provide a temporary access to your J! backend by email so we can investigate it.

hi, i could not succeeded to work ARI Image Slider. .ini file is now inside the folder where the images are.

file is as below,

path is : <http://etrasu.com/demo/images/slide/>

could you help me?

INI file looks normal. Could you provide a temporary access to your J! backend by email so we can investigate the problem in more details?

Regards,
ARI Soft

Try now. Old version of the module (v. 1.6.8) was installed on your site. We upgraded it to the latest version (v. 2.1.0).

Regards,
ARI Soft
