
Close the module from being indexed by search engi

Posted by Adrian1111 - 2013/04/23 12:34

Hello!

I want to thank you for such a nice extension. I have a question:

I installed on every page of the site a few copies of this module. Web site design is required. Each slideshow module is a link to the subdomain. Site is made for joomla 1.5

It's not very good in terms of search engine optimization. How do I hide from indexing by search engines this module?

Thank!

=====

Hello,

You can modify the module and add rel="nofollow" attribute for links which are created by the module.

Regards,
ARI Soft
