Image Slider Not working

Posted by aguilar1181 - 2013/04/27 21:04

_____

I see that you guys are really good at providing support so I figure I start here.

For some reason the slideshow doesn't want to work with my template the site is metamediadev.com/indipark2

Thanx in advance.

_____

Hello,

jQuery library on your site is loaded in an incorrect way. jQuery.noConflict() method should be called immediately after load jQuery library to avoid conflicts with MooTools library, jQuery.noConflict() method is called later.

Regards,
ARI Soft

_____

Open browser's error console in a browser and you will see it contains javascript errors which are not related to "ARI Image Slider", but it prevents execution of "ARI Image Slider" javascript code. MooTools library is not loaded on your site (it seems the library is removed by a 3rd party extension), but Joomla! javascript code which uses MooTools is loaded and it causes the error.

Regards,
ARI Soft
