
min width

Posted by Pipopoplin - 2013/04/30 18:47

Hi I have a small problem with the maximum width of the slider. The slider works very well up to an image width of 375px. However, on mobile devices, the mini should be times image width ~ 310. Is it possible to change the minimum width?

Hello,

The extension doesn't support ability to define different width for mobile and other devices.

This problem with site template styles. See /templates/shaper_helix_ii/css/template.css file. min-width: 280px CSS property is defined for ".container" element.
