
In spanish language, image with cb login page

Posted by nino59 - 2013/05/15 11:16

Hi,

Something strange is happening with my psanish version of my website.
I have joomla 2.5.9 + cb 1.9. The website is multilingual EN, FR, ES.

So I created 3 Ari image slider modules (1 for each language). Each slider module load 3 different images. The images are stored in 3 different folders (1 for each language).

I have a problem with Ari Image Slider in spanish, it create a 4th image blank and a link to cb login page, without any reason!

The configuration of each module is exactly the same, the only differences are:

- 1)the folder where images are stored is different,
- 2) the language of modules are different (English for EN module, SPanish for ES module, etc...)

Have a look at the screenshot of the console. You will see this link:

Someone can help me please?

Hello,

Provide a link to a page where we can see the problem.

Regards,
ARI Soft
