_____

Hello,

I tried and mod is working fine.but description is not working with images.what can I do for this.live links are below.

http://betasite.tk/gamunu/

http://betasite.tk/gamunu/modules/mod_ariimageslider/ariimageslider.ini

I have used latest version of this.please help

Thanks :)

Hello,

INI file should be located in folder with images. You can find this information in "Description" section on module settings page:

 http://www.ari-soft.com/images/fbfiles/images/descr.jpg

I'm having this problem right now and I think I followed the instructions. The INI file is in the same folder as the images. The filename is default. It is "ariimageslider.ini".

I have the images inside /images/slideshow/slideshow1 directory. Inside it is the INI file as well. In the DESCRIPTION parameter, I have ariimageslider.ini filled in there.

What else am I missing here? Please help.

Thanks.

Hello,

Where we can see the problem?

Regards,
ARI Soft

_____

You use incorrect file names in INI file. You images have names like 1.JPG, 2.JPG and etc., not 1.jpg, 2.jpg and etc.
