Multiple language image slider

Posted by Cameleon - 2013/07/10 15:16

_____

Hello,

How can I define multiple language descriptions in the INI file. Is there a certain syntax?
Can you give an example please?

By the way, your module is great!

Regards and thanks in advance.

_____

Hello,

You can read how to create INI files for different languages in "Description" section on module settings page.

Regards,
ARI Soft
