Hello,

I use mod\_ariimageslider on joomla 1.5.

So I have problem with image position.

When module load he have good position, but after animation its dont go back in his place.

This problem with site template styles. Add the following CSS rule to fix the problem:

```
DIV.ari-image-slider,  
DIV.ari-image-slider DIV  
{  
    padding: 0 !important;  
}
```
