
Position of navigation buttons (small dots)

Posted by edelephant - 2013/07/14 13:06

Hello! Thanks for your fantastic slider. I have a problem. My site shows the navigation buttons (small dots) in the slider pictures and on top left position. I want them to be under the slider such as the default demo in your site. Can anyone help me?

Hello,

Where we can see the slider?

Regards,
ARI Soft

Default "ARI Image Slider" styles are overridden by your site template. See the following CSS rule in /templates/zt_maju25/css/template_rtl.css file:

```
div.nivo-controlNav {  
  clear: both;  
  left: 12px !important;  
  margin: 0 auto;  
  position: absolute;  
  top: 25px;  
}
```

Regards,
ARI Soft

Thanks for fast answer.
I found the mentioned css at the bottom of my template_rtl.css file.
It is just as you said.
What should I do now to fix my slider?
Forgive me If my question is amateur.

For example you can remove the CSS rule.
