
images doesn't show properly

Posted by paopae - 2013/07/24 14:35

i have installed Ari Image Slider and it works great but the slide just keep showing some part of the picture not whole of it.
www.intplace.com

Thanks

Hello,

Set "Responsive" parameter to "Yes" in module settings.

Regards,
ARI Soft

is it in the module manager of ARI Image Slider? but i just can't find the responsive parameter.
in case it helps, i'm using joomla 3.1.1

Thanks for helping

You use very old version (v. 1.6.8) of the extension. Upgrade it to the latest version.

You're right. now i've upgraded to the latest one and found the responsive parameter then choose Yes.
but it's still the same problem

Thanks
