
always loading gif

Posted by maxis001 - 2013/08/20 16:39

site is almaz-service.com

in the top there is always loading gif. HTML was generated properly - I see images. i tested all files - all is good and downloadable.

I also make test page, where was only Image Slider scripts, css and html-code. And I also see only loading

<http://pix.am/dYcT/>

what it may be ?

oh i See - there is conflict between ariextmenu
and ariimageslider

```
;(function() { var _menulnit = function() { new Ext.ux.Menu("ariext60",  
{ "direction": "vertical", "autoWidth": false, "transitionDuration": 0.2, "animate": false }); Ext.get("ariext60").select(".ux-menu-  
sub").removeClass("ux-menu-init-hidden"); }; if (!Ext.isIE || typeof(MooTools) == "undefined" || typeof(MooTools.More) ==  
"undefined") Ext.onReady(_menulnit); else window.addEvent("domready", _menulnit); })();  
jQuery(document).ready(function() { var $ = window.jQueryNivoSlider || jQuery;  
$("#ais_61").nivoSlider({ "effect": "slideInLeft", "animSpeed": 0, "pauseTime": 5000, "controlNav": false, "randomStart": true, "dire  
ctionNav": false, "directionNavHide": false, "responsive": true }); });
```

Hello,

It can not be a conflict between "ARI Ext Menu" and "ARI Image Slider" because they use different javascript frameworks.

Where we can see the problem (provide a link to a page where we can see it, not a screenshot of HTML code of a page)?

Regards,
ARI Soft
