
Slider disappeared after joomla update

Posted by thenatura69 - 2013/09/05 08:01

The image slider has been working perfect until I updated Joomla from 3.1.1 to 3.1.5

All settings have been doubled checked. Everything is as is should be, ini file, slides. You can even see the code for the slider when you inspect the html on the page, it's just not displaying the slider. Any help greatly appreciated.

Hello,

Where we can see the problem?

Regards,
ARI Soft
