
ARI Image slider loads but Images will not

Posted by fyrfr72 - 2014/01/07 22:08

I cannot get the images to load and I have this module working on other sites, including the same template. I cannot find the plugin that is causing the conflict. If you could help me I would appreciate it.

Joomla 3.2.1

The latest version of your slider.

Hello,

The slider doesn't contain images. Probably an incorrect path to folder(s) with images is used.

Regards,

ARI Soft

Thank you. Yes a misspelled folder in path. I should have followed what I normally do which is sleep on it, being tired at the end of a long day breeds these simple mistakes. :)

Your module is the best one I have found, thanks for it!

Thanks again, Gene
