
CANNOT MAKE SLIDE SHOW WORK

Posted by compserv4u - 2014/01/19 16:58

For the life of me I cannot make a slide show work on my Joomla website.

I have tinkered with it for hours.

I am missing something.

The problem is only the first picture shows and it does not scroll to the other 2 pictures.

website is www.esystemsales.biz

I am running Joomla 2.5

Thanx
Dave G. :)

Hello,

It seems the extension was installed incorrectly. Some javascript files which are used by the extension can't be loaded (404 HTTP error occurs). Try to re-install the module.

Regards,
ARI Soft

I reinstalled the module with no change.

I was unable to make other sliders work from different software companies.

How do you tell the Java Script is not working?

I think it is safe assume there is something else wrong. Maybe with the web host or the server.

Thanx
Dave G. :)

It can be a problem with configuration of .htaccess file. You can contact your site administrator or hosting support so they check it.

<http://www.ari-soft.com/images/fbfiles/files/.txt> Here is the .htaccess file.

what do you think?

This is not "ARI Image Slider" issue. This global problem on your site. Contact your site administrator or hosting support so they investigate it.

I was sure.

Thanx

How do I make a donation via Paypal?
