
Problem with lightbox

Posted by olivier - 2014/01/21 16:35

Hello,

I want to use a lightbox on my slideshow but:

- I do not know what the Core Joomla! lightbox
- I installed RokBox but when I selected in the settings of ARI module nothing happens on my site
- I get the message "ARI Image Slider:" - ". Plugin Is not installed" System Ninja Shadowbox

Why none of them work?

thank you in advance for your help.

Hello,

"Core Joomla! lightbox" is lightbox which is included into Joomla! system by default.

About RokBox check that you install system plugin.

Regards,
ARI Soft
