## Not sliding automatically

Posted by Mumentity - 2014/01/29 23:42

---

I've tried various iterations of the enable jquery; don't enable, no conflict etc. The images load, but do not scroll automatically.

i have jquery used on another section of my site already, do they cause conflict if multiple instances of jquery are loaded?

I'd appreciate it if you could take a look!

Tried removing all other instances of jquery. Have, currently only jquery 1.8 runs. Still not sliding

Let me know!

Hello,

Set "Manual advance" parameter to "No".
