Slider shows blurred photos

Posted by geolino - 2014/02/05 09:54

_____

Hi,
I have tested the Ari Image Slider and have got blurred photos. My original photos are 800*200px. The slider size and the lightbox size as well. I use the core Joomla lightbox.
When I click on the blurred photos, the popup lightbox shows the pics correctly.
What is my error?

Hello,

Where we can see the problem?

Regards,
ARI Soft

_____

We can investigate the problem if you provide a link to a page where we can see it.

Regards,
ARI Soft

I could resolve the issue. I had chosen: Use thumbnails. The thumbnails were 150x38 px and were saved in the folder cache. These small pics were used for the big slideshow 800x200. By the blow-up to 800x200 the pics were blurred. Now, I do it without thumbs, and it works correctly.

Best regards
geolino
