
Rounded Corners

Posted by beevo - 2014/02/12 18:29

Hi. Firstly thanks for a great module. Can you tell me how I might be able to apply rounded corners to this module? I currently have previously made rounded corner images and the module is 'squaring-off' on the out side. I would like it to match. - thanks http://www.ari-soft.com/images/fbfiles/images/square_corners.png

Hello,

Add the following CSS rule to "CSS Styles" parameter in module settings:

```
.nivoSlider,  
.nivoSlider img {  
    border-radius:10px; /*change value based on preference*/  
}
```

Regards,
ARI Soft
