Need images to display full width

Posted by Westlake - 2014/02/14 18:57
_____

Hi, I use your slideshow all over my site with great success, easily adding individual slide shows on multiple pages across the site. Now I have a special project that needs to display a slide show across the full width, beyond the boundaries of the sheet defined by the template, on both sides. I don't want the images to be full screen (ie cover the header, menu, and footer). When I insert the slideshow now the image extends to the right side beyond the sheet, but not on the left. How do I achieve the effect that I want?

Thanks for the help!

Hello,

Could you provide a link to a page where we can see the slider and an image where we can see what do you want to achieve?

Regards,
ARI Soft
