ARI Image Slider stopped working

Posted by wowbagger60 - 2014/02/16 13:59
_____

Hi,

On my website the ARI Image Slider recently stopped working. When loading the page the image loading icon appears but the image does not display.

The slider worked perfectly until some days before. My hoster recently switched to PHP 5.4, don't know if this has something to do with my problems.

The website is e.g. http://www.cafeteriamataencantada.com.br/pt/bar

Thanks,

Ueli

Hello,

This is not "ARI Image Slider" issue. If you open browser's error console, you can see it contains javascipt errors which are not related to "ARI Image Slider", but they prevent execution of "ARI Image Slider" javascript code. The errors appear because /templates/punktlandung/js/template.js.php file is corrupted (we can recommend contact site template developers so they fix the problem).

Regards,
ARI Soft

Thank you for super-quick response. I'll check with the developer.

Cheers,

Ueli
