Ari image slider alt, title ... problem
Posted by crispuchita - 2014/02/26 07:19

_____

Hi guys,

i bought a joomla template which contains the ari image slider. I'm building the website with xampp until is ready to go online. I search on the forum for the alt, title, etc to make my website more seo friendly.
I have the images and the .ini in a file named slide. I used the original ariimageslider.ini write the alt

meubelrestauratie.jpg="Meubelrestauratie"
meubelstofferen-bank.jpg="meubelstofferen"

so it should be fine but... it's not working.
When i look the source of the website there is no alt whatsoever...

What m i missing???

Please help me and lots of thanks Cris

_____

Hello,

We offer "ARI Image Slider" only on our site and don't have any relation to 3rd party templates which contain our extension so we recommend to upgrade "ARI Image Slider" to the latest version. Check also that INI file is located in folder with images.

Regards,
ARI Soft

Hi admin!

thanks for your fast answer, i did put the ini file in the folder with the images. the version that i'm using is the 2.1.0 form march 2013.
I just downloaded and installed the last version ;)
Thanks Cris
