
Slides not loading in Artisteer template

Posted by wecreatem - 2014/03/14 00:45

I have designed a sight in Artisteer at www.basslakedouble.com and the photos do not load on the main page. There are three separate slide shows at positions 16, 17 and 18. Do you have any idea why the pictures are not loading?

Note: the site is under construction so I will need to send you access information if you need to look at the site.

Hello,

Send a link to a page where we can see the problem.

Regards,
ARI Soft

The site is <http://www.basslakedouble.com>

I sent the sign-on and password information to info@ari-soft.com as a reply to your e-mail to me.

Thanks for your help.

Thanks that seemed to fix the problem. I am curious, is this something that I did in setting up the slides? What happened so that I know how to fix it in the future.
