
Slider won't display on one page of the site

Posted by a2zcs - 2014/03/22 21:38

The slider is showing fine on all pages of the site except the Contact Us page. Nothing different about this page other than the core Contact Form of Joomla.

Site is <http://hometowndemo.com>

Joomla Version is 3.2.3

Any thoughts ... Anyone?

Hello,

Set "Load jQuery method" parameter in module settings to "Local copy" value.

Regards,
ARI Soft
