
ARI Image Slider is not sliding...

Posted by deva - 2014/05/07 16:35

Hello

Please look at this site <http://sectech.tau.ac.il/cyberconference/>

In the box named: "sponsored by:" I located your module

But it not sliding

Can you please tell me why?

Thank you

Priya

Hello,

It seems you load the module not to a module position, it is loaded by 3rd party extension which can't load javascript and CSS files which are loaded by the module. Load the module to a module position or use another extension to load the module, for example "Module Plant".

Regards,

ARI Soft

Hello

Thank you for the tip

I did it and now nothing is shown

Hello

I installed the plugin

Enabled it

And put the short code in the right place

the ID didnt work...

Use the following plugin code:

For example if ID of "ARI Image Slider" module is 15, use the following code:

Thank you
It worked!!!
Can I remove the shadow?
