
Can description have a title?

Posted by tango91a - 2014/05/08 13:49

Hi,

Thanks for the great product. Is it possible to have a Title along with the description on the image slider?

For example:

ARI SOFT

A great team of professionals that specializes on creating free and commercial Joomla! extensions of high quality

If this is possible can the text be formatted?

Best Regards,
Paul

Hello,

It is possible to use HTML code for descriptions. For example use the following content in INI file:

```
ari-soft.jpg="ARI SoftA great team of professionals that specializes on creating free and commercial Joomla! extensions of high quality"
```

Regards,
ARI Soft
