## ARI Image Slider Update

Posted by icomex - 2014/06/16 20:05

---

We purchased an template from <http://www.joomlage.com/> that included the ARI Image Slider version 2.1.0.

We checked the forums and we see how to add the .INI file for adding descriptions, links and ALT text to the images in the slider. In the Module Manager in Joomla 3.2.3 we are not seeing the field the specify the name of the .INI file.

Where do we get the latest version? The Joomla.org extensions site shows the current version as 2.1.11.

The ARI Image Slider page at <http://www.ari-soft.com/Joomla-Components/ARI-Image-Slider/Detailed-product-flyer.html> is a dead link.

Is there a default .INI file name and location that can be used with the version we have installed? The client really likes the image slider, we just need to get links working.

Hello,

The latest version of the extension can be downloaded here:

<http://www.ari-soft.com/images/fbfiles/images/link-e11e845d7304c46b70595651b8e1e760.jpg>

Hello,

So, this is what I get if I got to that URL: <http://www.ari-soft.com/images/fbfiles/images/slider-b96b87906a498ac30935e1d01db49e08.jpg>

The link is

<http://www.ari-soft.com/Joomla-Components/ARI-Image-Slider/Detailed-product-flyer.html>

not:

<http://www.ari-soft.com/Joomla-Components/ARI-Image-Slider/index.php>

It seems this is a problem with browser's settings.

PS: We sent the module by email.

Thank you sending the installer via email.

It appears to be a challenge with the Firefox browser getting to that page. The URL works fine in Chrome, Safari and MSIE. Very weird...
