
How to set image path in joomla3.3

Posted by chorawut - 2014/09/06 19:51

I just installed ARI Image Slider but I don't know how to make it work. I can't find the module parameters in joomla 3.3 and I can't put image path. Could you please help me?

Configure main module parameters, specify relative path to images in 'Image path' parameter

Hello,

If images are located in /images/album2014 folder then populate "Image path" parameter with the following value:

images/album2014

Regards,
ARI Soft

Thanks for your replying. But in joomla 3.3 I can't find where to put "Image path". Is it in joomla/backend ?

Open "Extensions -> Module Manager -> ARI Image Slider" page and see "Module" tab:
