## Problems with ariimageslider.ini

Posted by Cesare - 2014/10/01 23:26

---

I plugged in the slider in the site [www.ilsipariobari.com](http://www.ilsipariobari.com), but I can not write the text with the ini file. The image path is /images/simona\_rutigliano\_8.jpg etc

I have to write

/images/simona\_rutigliano\_8.jpg = " Simona Rutigliano Critics Award Spettacolato 2014 "?

Hello,

Place INI file to folder with images and specify only file name in it. For example:

simona\_rutigliano\_8.jpg = " Simona Rutigliano Critics Award Spettacolato 2014 "

BTW, [http://www.ilsipariobari.com/images/simona\\_rutigliano\\_8.jpg](http://www.ilsipariobari.com/images/simona_rutigliano_8.jpg) file doesn't exist on your site. You can see it if try to load the image into a browser.

Regards,  
ARI Soft

Thanks, it works. The images are in the folder /nuovosito/images.
