
Ari not sliding

Posted by ube87 - 2014/10/08 14:22

Hi,

i just installed ari image slider in my website bunkersoftair.it . It shows the first image but it's not sliding at all. I tried different ways to set the parameters but still nothing happens. Please mind that i'm not so good with joomla, but i hope you can still help me.

Hello,

This is javascript conflict. Several versions of jQuery javascript library are loaded on your site. One version by "ARI Image Slider", the second version by swmenu extension and the third by site template. Load it only once. For example you can use "Easy jQuery" plugin for this purpose.

Regards,
ARI Soft
