
Conflict with PhocaGallery

Posted by Azuremist - 2014/11/01 16:44

Hello!

i've got problem on page where installed phocagallery component link

On other pages slider works fine.

i use jquery no conflict and local copy load.

Hello,

The page contains javascript error (you can see it in browser's error console) which is not related to "ARI Image Slider" but it prevents execution of extension's javascript code. It seems the error occurs because PhocaGallery try to use SqueezeBox, but it is not loaded.

Regards,
ARI Soft

The following javascript code causes the error:

```
jQuery(function($) {  
    SqueezeBox.initialize({});  
    SqueezeBox.assign($('a.pg-modal-button').get(), {  
        parse: 'rel'  
    });  
});
```

We suppose this code is added by PhocaGallery and we can recommend to contact PhocaGallery support so they fix this problem.

Regards,
ARI Soft
