
integrate ARI Image Slider in text

Posted by vriendje - 2015/03/02 13:35

Hi,

I used `{arislider moduleId="88"}{/arislider}` in my text.
This code I found from a former thread.
I tried some variations in the code but no luck.
Did I miss something?

The use of the module on my home-page is of no problem, looks very good!

Joomla 3.4.0
Ari Image Slider

Thank you in advance!

Bert

Hello,

This code for "ARI Slider" extension, not for "ARI Image Slider".

If you want to load the module into an article, you can use "Content - Load Module" standard Joomla! plugin or 3rd party plugin like "Module Plant" or "Modules Anywhere".

Regards,
ARI Soft
