
background colour in ARI image slider

Posted by dev9works - 2015/03/13 09:02

hey,
how to add a full width background colour in ARI image slider.
I have added images but it will look great if added a background colour. <http://www.ari-soft.com/images/fbfiles/images/slider.PNG>

Hello,

Where we can see the problem?

Regards,
ARI Soft

Images look normal, could you explain in more details what background do you want to change?

Add the following CSS rule to "CSS Styles" parameter in module settings to set background of slider's container element:

```
.ari-image-slider-wrapper {background-color: red;}
```

Thanks! admin really appreciate the help.

can we set this to full width ?

At present it is wrapping the slider only and i want this to be full width.

Set "Width" parameter to 100% value and "Responsive" parameter to "Yes" in module settings.

This i have done in the image slider module.But any method to do keep width of background colour more than the slider module.And which looks like the slider is placed in that background colour.

Currently I have managed to do so by creating a background image to that particular module but it is not going up and down with the slider.

can check exactly what i wanted here www.rmwebtech.com/rmw

The slider fills all available space for the selected module position. Left and right paddings are added by site template.
