ARI Image Slider not on JED?

Posted by tekfix - 2015/03/26 16:23

_____

I am using ARI Image Slider on one site and wanted to download and use it on another new site. Now I realised that it is not available on the JED ("Vulnerable Extension"). I can not find any problem reports in Live VEL, though...

What's up - should I be concerned for my site?   :(:blink:

_____

Hello,

The extension has unpublished from JED by a mistake. VEL team is sent request to JED team due to posts in this topic on Joomla! forum. The problem was with a site template of "tbacar" user, not with "ARI Image Slider". We sent a request to JED and asked to re-publish the extension, but JED is supported by volunteers and it requires a time to take an answer.

Regards,
ARI Soft

Fine. Thanks for the info! I thought that would be the case as I did not find any other mentions of this on the web, but wanted to make sure. It's a very nice module! :-)
