
Background not fitting images...

Posted by geoff - 2015/05/21 03:17

Hi,

Why does the background not fit the image?

All images are the same size, the background borders nicely top, bottom, left but not right.

Here is the link...

<http://trackcare.com.au/home/>

Any ideas?

Hello,

This problem with site template styles. Add the following CSS rule to "CSS Styles" parameter in module settings:

```
.nivoSlider IMG {margin:0!important;border-style:none!important;}
```

Regards,
ARI Soft
