
where are the pages in Ari Image Slider?

Posted by Jos - 2015/06/24 06:58

Hi,

I can't figure out where I set on which pages Ari image slider has to work. I've installed the module (on local host), everything is set. Apart from the pages. That's none, because I can't find where to set it.

Can you help out? Thanks!

Hello,

Pages where the module will be shown are set for "ARI Image Slider" as for any other Joomla! module. See parameters on "Menu Assignment" tab on module settings page:

http://www.ari-soft.com/images/fbfiles/images/image_slider.png

Regards,
ARI Soft
