Hello,

Send a link to a page where the problem occurs.

Regards,
ARI Soft

I have no idea how to do that. could you clarify a little more where and how to do that?
Thank you

Open "Extensions -> Modules" page on Joomla! backend, find "ARI Image Slider" module, open module settings page, set "Load jQuery method" parameter to "Local copy" value and save module settings:

now I get this: " I'm not a robot ."
When I send the following error message :Not Found

The requested URL /tuvozdigital.com was not found on this server.

Additionally, a 404 Not Found error was encountered while trying to use an ErrorDocument to handle the request.

and does not send the message.

Thanks, I already get the captcha and works. The message is not getting me to mail, but it must be another problem .
Thank you
