ari image slider hides the art responsive menu
Posted by ibobster - 2015/11/13 19:10
_____

My ari image slider hides the art responsive menu

http://rubber-tracks.ameritraxlosangeles.com/

I have tried a few options, but none work 'yet'

What CSS Rule do I apply, as there is lots posted..

Do I add CSS Rule to my A4joomla Template.css, or do I add the CSS Code into the ARI Module CSS Styles section..

Thanks all..

Hello,

Where we can see the problem? The home page doesn't contain "ARI Image Slider" module.

Regards,
ARI Soft

Hi, you don't really expect developers to leave for the there site for the night with modules that don't work, that's not cool :unsure:

If you like I can activate it in again, but I can't leave it up for hours..

Please let me know so all us Joomla peeps can use your stuff.

_____

Ok, so it's in place...

The Slider is ARI, the Menu is ART

So far the only fix is, Use ARi slider / menu or use Art slider / menu..

This problem with site template styles. Add the following CSS rules to a site template CSS file or to "CSS Styles"
parameter in module settings:

BODY #header {position:relative;z-index:2;}
BODY #allwrap {position:relative;z-index:1;}

Regards,
ARI Soft

Hi, you wrote:

This problem with site template styles. Add the following CSS rules to a site template CSS file or to "CSS Styles"
parameter in module settings:

BODY #header
BODY #allwrap

** Do we add the CSS Styles parameter in the Ari Module or the Art Module... or add them to both...

_____

It is enough to add these CSS rules to "CSS Styles" parameter in "ARI Image Slider" module settings. Copy correct CSS
rules from our previous message.

Regards,
ARI Soft

_____

Added to the Ari Module...   at the CSS Styles section

Take a look...

You added an incorrect code. Open this post and copy correct CSS rules.

Regards,
ARI Soft

BODY #header {position:relative;z-index:2;}
BODY #allwrap {position:relative;z-index:1;}

Fixed.. Now you guys Rock !

Thanks team Ari..
