
ARI Image Slider

Posted by pixelschupser - 2015/11/20 09:40

good morning support

I want to have more windows in "ARI Image Slider"

What I mean i want to have more than 25 image slider on my homepage.

Can I create more thsn 25 "ARI Image Slider" or did this not function.

At the moment I have created 25 ARI Image Slider and have now created the 26 th.

But it doesn't function. I have copied to different ARI Image Slider to a new one,

have changed the directory with the pictures to the new one, than I have saved + closed

go to the components window an change the entry for ARI Image Slider to "168" and shsow it on browser.

but nothing function, i see the old pictures.

I go back to the new ARI Image Slider "kaffee" and it shows only the old directory from "kork"

I have tested it also with the first entry of "ARI Image Slider" it's the same result.

Nothing goes.

kind regards

HanjsÄ¶rg Lauble

Hello,

It is possible to create as many module instances as you want. This is a standard Joomla! feature.

Regards,

ARI Soft
