
Show Slide Show module in article?

Posted by SHennig - 2015/12/20 05:59

Hi
I am new to web design & have a couple of questions regarding slide show & lightbox.

is it possible to add slide show module into article?
can i have different gallery slideshow in different articles?
how do i use light box with slide show?

any help is appreciated i have tried looking but failed.

thanks in advance

Hello,

Joomla! modules can be loaded into articles with help of "Content - Load Module" standard Joomla! plugin or with help of 3rd party plugins like "Module Plant" or "Modules Anywhere". It is possible to create as many module instances as you want and load them into articles or module positions.

See "Lightbox integration" parameter in module settings for integration the slider with a lightbox.

Regards,
ARI Soft
