## Slides not showing

Posted by wecreatem - 2016/01/23 22:56

---

I have a site at Blossombikeride.com with two image sliders on two different pages. I have made copies of the module and placed them on the particular pages using module anywhere. The only think I get is a circular image indicating the image is loading, but they do not load. The images on the two pages are in separate folders so they do not get mixed up with each other.

If you need access to the site, I can send it to you by e-mail.

Hello,

This problem with "zoomin" plugin. It loads own copy of jQuery library instead of using instance which is loaded by Joomla!

Regards,  
ARI Soft
