## images not show

Posted by roman5527 - 2016/02/25 20:24

---

Hi i use ARI slider on web : <http://www.zsdunajskaluzna.sk/> - top right corner

But images is dont show. But url is ok . Images are from EventGallery. Can you help me ? Thanks

Hello,

This problem with permissions for image files (folder where). You can see it if try to open a file directly into a browser. For example use this link.

Regards,  
ARI Soft

Yes I see it.

But permission is ok . folders have 755 and files 644.

Check rules in .htaccess file. In any case this is not "ARI Image Slider" issue. This problem with configuration of your web server (for example in .htaccess file) or with file (folder) permissions.
