
Error 500 with joomla 3.5

Posted by jerker.klang@isil.se - 2016/03/30 12:57

I have used ARI Image Slider since 2013 without problem. When i uppggraded my joomla to version 3.5 today it wÃfÂ³nt display annything if the ARI Image Slider modulke is active. If i unpublish the module, the rest of my sight is display correct. Anny idÃfÂ© whatÃ,Â's wrong?

Hello,

Upgrade the module to the latest version (2.2.0). It is available here.

Regards,
ARI Soft
