
Picture not displaying on Page but does in pop-up

Posted by Scott_B777 - 2016/05/06 02:18

Hello!
I'm having issues getting a local picture to show up on my web page using the Anywhere plugin. If you click on where the small icon is in place of the picture, it shows correctly. I hope someone can help me to resolve this issue. Below is a link to the page.

Thanks!!
Scott

Hello,

Set readable permissions for all for /cache/ folder.

Regards,
ARI Soft

Thank you so much for your quick response!

Yes that did the trick but, for some reason I couldn't make those changes. I had to delete the folder and then recreate it.

Best regards,
Scott
