
ARI Image Slider hides dropdown menu (Joomla 2.5)

Posted by ffrosh - 2016/05/10 12:54

Hello,
I have a website running gantry framework on top of joomla 2.5 and the image slider is running in front of the dropdown menu.
I did try to raise the z-index in template css but it had no effect.
Any ideas?
LinkLink

Thanks in advance!

Hello,

This problem with site template styles. Add the following CSS rule to "CSS Styles" parameter in module settings:

`BODY #rt-main-surround {z-index:1;position:relative;}`

Regards,
ARI Soft
