
Upgrade from 2.1.0 to 2.2.1

Posted by hughletheren - 2016/05/27 15:52

I have just upgraded from 2.1.0 to 2.2.1 at the same time as upgrading from Joomla 3.4.8 to 3.5.1.
I have changed nothing but the autoscroll now does not work. Help please! I can advance the slider image by clicking on the navigation arrows but there is no auto slide show.

Hello,

Check that "Disable auto-rotation" parameter is set to "No".

Regards,
ARI Soft
