
Is image preloading possible?

Posted by thellie - 2016/10/25 12:37

Hi :)

I set up a module running a set of images on my site home page, but if a user clicks a link before the images are loaded, it links to one of the loading images (it may be the first image each time).

Once the images are loaded, there is no problem. I can't see an option to preload images before the page opens - is there one?

In the meantime, I've had to unpublish the module as it is causing too many issues - well, the same issue, but too many times.

Hello,

Is it possible to see the problem anywhere?

Regards,
ARI Soft
