Slider not showing at position

Posted by davida - 2016/11/02 12:19

_____

I have installed the latest module 2.2.1 and I am running joomla 3.6.4
I have set the slider at position-2 and specified the image folder but the slider is not appearing.
Any ideas why?
www.yachtmasterinsurance.co.uk
It should appear on the home page immediately under Yacht & Motorboat Insurance - Click for a Quotation
Many thanks

_____

Hello,

Modules are loaded into module positions by site templates so this is a problem with site template and the selected module position or configuration parameters on "Menu assignment" page on module settings page.

Regards,
ARI Soft
